Program Spaces –
Ed Specs. / Adjacencies

All program spaces required by DCPS and adjacencies are achieved.

Organic flow of programmatic spaces are achieved.

Interior spaces provide multiple educational uses.

All program spaces required by DCPS are achieved.

The majority of adjacencies are achieved.

Organic flow of programmatic spaces are almost achieved. This is due to addition of 3rd floor.

All program spaces required by DCPS are achieved.

Educational adjacencies are NOT achieved.

Flow of programmatic spaces is disrupted.

Exterior circulation flow / accessibility to campus

Accessibility to campus from Newark and Macomb. **Access from 45th Street is decreased compared to existing campus layout.**

Clear exterior circulation, flow, and connectivity between exterior campus spaces.

Building geometry embraces range & integrates outdoor learning environment

Accessibility to campus from Newark, Macomb and 45th Street.

Clear exterior circulation flow and connectivity between exterior campus spaces.

Building geometry embraces range & integrates outdoor learning environment

Accessibility to campus from Newark, Macomb and 45th Street.

Not a direct connection between range and the rest of the school campus.

Multiple entry and exit points to different buildings.

Sustainable features

Green roof and educational spaces are achieved.

Hybrid Geothermal system is applicable for this option.

Integration of garden spaces in the roof and ground floor.

USBG Silver requirement is achieved.

Green roof and educational spaces are **limited**.

Hybrid Geothermal system is applicable for this option.

Integration of garden spaces.

USBG Silver requirement is achieved.

Access to green roof on Building C is eliminated.

Traditional HVACs system recommended due to separation of buildings.

Segregation of outdoor spaces.

USBG Silver requirement is **more difficult** to achieve.

Access to Range
from 45th Street

This option has the **LEAST** amount of square feet to connect from 45th Street to the range.

12 FEET clear access from 45th Street to range.

NO view to range.

This option has **medium** amount of square feet to connect from 45th Street to the range.

64 FEET clear access from 45th Street to range.

Partial view of range.

This option has the **MOST** amount of square feet to connect from 45th Street to the range.

72 FEET clear access from 45th Street to range.

Unobstructed view of range.

Conclusion

● Option 1

● Option 2

● Option 3

This proposal works **best** for the school, its students, teachers, and staff.

This option is the least favorable among 45th Street neighbors.

This is option has received support from Macomb and other neighbors.

This is the most cost effective option.

This option works well for the school, its students, teachers and staff.

This option is a medium compromise between 45th Street neighbors and students.

This option is cost efficient but increases construction costs compared to Option 1.

This option compromises educational programs for the school, its students, teachers and staff. It is the least advantageous for them.

This option is the **most** favorable among 45th Street neighbors.

This option is the most expensive construction proposal.
