Date: May 30, 2023
Subject: Fire Department Engine 22: Environmental Safety Testing Result Notification

Commissioner Palmer:

The Department of General Services (DGS) takes our commitment to maintaining the health and safety of our residents seriously. One of our responsibilities is executing the Public Facilities Environmental Safety Amendment Act of 2020, which requires DGS to conduct proactive, routine testing of public buildings across 17 environmental parameters. We write to you today about test results and related remediation at a building in your Single Member District.

During routine testing at Fire Department Engine 22 at 6825 Georgia Ave. NW, we found elevated dust levels in the parking garage. We are determining the source of the dust and will remediate as appropriate. We also found evidence of pests in the building. Remediation is underway and expected to be complete by June 5. If you would like to track the progress of this work, the work order number is 744469.

Note: We have notified the appropriate agency point of contact and remediation of these issues is not expected to impact operations.

What are the next steps? In accordance with the Public Facilities Environmental Safety Amendment Act of 2020, details and test results will be available on the DGS website. DGS will also hold a public meeting on June 7 at 6:30pm to share details. You can join the meeting by using this link: <https://dcnet.webex.com/dcnet/j.php?MTID=m0d09fc53383c1344d8af1c7b4cf9b7f5>. Feel free to share this link with community members as needed.

We appreciate your time and understanding of the work that we are doing to maintain the health and safety of those who work at Engine 22. If you have questions, please contact Mike McLaughlin, DGS External Affairs at environmental.dgs@dc.gov.
