

**GOVERNMENT OF THE DISTRICT OF COLUMBIA
DEPARTMENT OF GENERAL SERVICES**

**ARCHITECTURAL/ENGINEERING SERVICES FOR THE
CENTER FOR THERAPEUTIC RECREATION**

Solicitation #: DCAM-15-AE-0121

**Addendum No. 1
Issued: April 6, 2015**

This Addendum Number 01 is issued by e-mail on April 6, 2015. Except as modified hereby, the Request for Proposals (“RFP”) remains unmodified.

Item #1

Sign-in Sheet: The sign-in sheet from the pre-proposal conference is attached.

Item #2

The solicitation number is hereby changed to **DCAM-15-AE-0121**.

Item #3

Offer Letter Attachment: Please see revised offer letter attachment.

Item #4

Phase 1 Archaeological Study: Phase I archaeological investigation is required that begins with GIS cut-and-fill and geoarchaeological testing. The need for, and locations of Phase I testing, will be determined in consultation with District’s Historic Preservation Officer (DC HPO). A work plan approved by DC HPO is required before any field work starts. An archaeological resources summary is attached.

Item #5

Site Visit: A site visit will be held on **Tuesday, April 7th at 1:00 pm**. Please meet the Department’s Program Management team at the Project Site. Please bring a government issued form of photo identification to comply with the facility’s security procedures.

Item #6

The bid date remains unchanged. Proposals are due by **April 21, 2015 at 2:00 pm EDT**. Proposals that are hand-delivered should be delivered to the attention of: Courtney Washington, Contract Specialist, at **Frank D. Reeves Center, 2000 14th Street, NW, 8th floor, Washington, DC 20009**.

Project Data Request - Archaeology

Project Location: **Center for Therapeutic Recreation, 3030 G Street, SE, Reservation 405, Washington, D.C.**
 Project Title: **Center for Therapeutic Recreation, SE**
 Landmark/District: **Fort Circle Parks HD, within Fort Dupont Park grounds**
 Created: **March 2015**
 Agency: **DPR/ DGS**
 Staff Reviewer: **Ruth Troccoli, Ph.D., SHPO Archaeologist**
Chardé Reid, Assistant Archaeologist

Archaeological Resources Summary:

Identified Archaeological Site(s) present?	Intensive Archaeological Survey Conducted?	Archaeological Potential?	**Potential Resource Type
No.	No, intensive survey has not yet taken place.	Yes, moderate-to-high for prehistoric and historic	Potential Paleosols, Prehistoric Camps, Historic Farms and/or Plantations, Civil War Camps, Contraband Camp(s).

**This information is potentially sensitive and releasing it to the general public should not occur without discussion with the SHPO due to looting and ARPA concerns.

Overview

Archaeological survey has not been conducted at the Center for Therapeutic Recreation project area, therefore, it is unknown if archaeological resources are present. Archaeological identification survey may be warranted prior to any ground disturbing activities on the property; please consult the City Archaeologist in the HPO on the need for archaeological investigations. Conducting a GIS cut-and-fill analysis that compares baseline historic topographic data, such as the 1888 US Coast & Geodetic Survey topographic map data to current topography is recommended because a former stream runs beneath the property in pipes, and the stream bed was filled.

The whole area in and around the parcel has moderate to high prehistoric and historic archaeological potential. Historically, the property was once much closer to the Anacostia River shoreline, a favorable location for both prehistoric and colonial occupations. Throughout the colonial period the area was only lightly populated. It was not until the 19th century when the larger land grants were subdivided that the area became more settled. The 1861 Boschke topographic map (LOC, Figure 3) shows fields and a structure (farm house/ plantation?) belonging to J.A. Smith within the boundaries of the park. Resources related to

this ante-bellum occupation, as well as prehistoric occupations, are expected where subsequent development has not destroyed them.

The project location is approximately a mile northwest of Fort Dupont. Fort Dupont was built in the fall and winter of 1861-1862 to fill gaps in the Fort Circle along the eastern approaches of the District. Fort Dupont supported a garrison of 300 infantry and 117 artillery troops, and was ultimately abandoned in 1865 when the land was reverted back to its original owner (Cooling and Owen 2010:216). Contraband camps were likely present in the general area during the war.

The area was subdivided but dwellings do not appear to be present in the project parcel, however, by the late 1940s several large multi-family buildings (possibly WWII housing?) were built within the park, but were demolished by 1957.

Resources Types

The area around the park would have been favorable for human occupation throughout the prehistoric, contact, and historic periods, and remains from all periods are expected where subsequent development has not caused a loss of resources. Potential prehistoric resources include remains of a lithic workshop and/ or quarry, or a habitation such as a camp or village. Civil War-related resources including camps, ditches, and contraband camps as well as sites related to early farms and plantations may also be present. The Potomac River's stream terraces and floodplains were excellent locations for finding prehistoric artifacts in the late 19th-early 20th centuries and the National Museum of Natural History, Smithsonian Institution has large collections from the area. Lithic quarries may be present in upland stream valleys. Soils are present in or near the project area that may date from the Paleoindian time period, identified on the Figure 2 as "potential paleosols"; these areas may warrant deep testing. See Wagner (2011) for some background on the subject.

Archaeological survey in locations where deeply buried resources may be present usually begins with geoarchaeological testing. This is a minimally-destructive, efficient, and cost-effective way to quickly identify whether buried deposits with archaeological potential are present. Locations that have been buried with fill, either purposely or through natural processes may warrant deep testing if the limits of disturbance of the project extend to potentially intact soil horizons beneath the fill. Mechanical testing may be needed to penetrate the fill or other deposits. Traditional shovel testing and similar means of site identification can be used in locations where the base of the fill is within the reach of hand-excavated tests. Close coordination with the DC City Archaeologist is needed to develop an acceptable work plan. **In no case should any work proceed without consultation and submission of a work plan for review and approval by the DC SHPO.**

See *Historic Contexts for the District of Columbia* (1991) for a summary of identified contexts. For recent prehistoric overviews see Berger (2008), Knepper

et al. (2006), and Versar (2013) (Reports 352, 201, and 560, respectively). The DC HPO web site has a link to a web tour on urban archaeology called "Washington Underground: Archaeology in Downtown Washington, DC" that includes information on District archaeology.

Resource Data:

Below is a GIS map (Figure 1) showing historic resources within approximately one half mile of the project area boundary and two data tables (Tables 1-2), followed by a list of report references. The map includes historic districts, archaeological sites (as points only), and polygons showing archaeological surveys. Basic archaeological site data are shown in Table 1. The survey polygons are keyed to the survey report number, which can be looked up in the survey data (Table 2) below, outlining project information. A second map (Figure 2) shows sites, Civil War fort locations, potential paleosols, and stream courses reconstructed from historic topographic maps including the 1793 Ellicott (LOC), 1861 Boschke (LOC), and 1888 USC&GS series (NOAA).

Please note that all levels of archaeological survey are included on Figure 1; the presence of a survey polygon does not imply that the survey depicted has identified all archaeological resources present, or that the survey complied with or met District and/or Federal standards for conducting archaeological investigations. A second caution is also in order regarding archaeological sites; precise locations do not exist for many of the prehistoric sites reported in the late 19th-through mid-20th centuries. The point locations shown for the early sites are approximations only and many have not been ground-truthed or even relocated. Temporary archaeological sites numbers, e.g., P14, P15, H12, are provisional numbers for locations that may warrant assigning a trinomial, but additional research and/or documentation is needed or pending. The site data are also keyed to the list of reports. The report references are in SAA format and are in report number order.

Please contact us if you have any questions of need additional information, site forms, or survey reports. See the DC HPO web site for information on other historic resources, including historic districts, and landmarks. The annotated 1998 *Guidelines for Conducting Archaeological Investigations in the District of Columbia* is available on the archaeology page of the HPO web site.

3. LOC also has versions of the 1857 & 1861 Boschke topos and a tiled version of the 1892 USC&GS topos (same as 1888 but a later engraving).

1888/1892: <http://hdl.loc.gov/loc.gmd/g3850m.gct00007>

1861 Boschke (county): <http://hdl.loc.gov/loc.gmd/g3850.cw0678500>

1857 Boschke (City): <http://hdl.loc.gov/loc.gmd/g3850.ct001206>

<http://hdl.loc.gov/loc.gmd/g3850.ct002292>

4. The LOC has scanned two series of Sanborns for DC, 1888 and 1903. These are full-color, high res scans of the original volumes.

<http://www.loc.gov/rr/geogmap/sanborn/city.php?CITY=Washington&stateID=10>

5. My favorite Civil War map – what we refer to as “Barnard 1865 Defenses of DC.” The Civil War forts & earthworks were added to the 1861 Boschke topo, and it was colored (hand tinted?) making it easier to read. Unfortunately the LOC taped the sheets together with wide joins so it is a bit off. I have georeferenced parts of it for specific projects, though, and use it to better understand the Boschke topos.

Barnard 1865: <http://hdl.loc.gov/loc.gmd/g3851s.cw0676000>
