## *Bear Grille Deco Mesh Fence*

The most attractive and decorative range of Deco Fencing Products available on the market. Bear Mountain's Range of Deco Fencing Solutions are available in a range of mesh types and gauges, colors, heights and can be provided with our unique Bear Grip Self-Locking Posts which eliminate the traditional assembly methods of fencing products. Bear Mountain's Deco Fencing Products can be assembled without the need to use any mechanical fasteners to connect the panel to the post. Another very unique feature is our Solar Light Post Cap which can illuminate the fence line without having to install any electrical infrastructure whatsoever!

### **3D MODELING**

Bear Mountain's Designers can provide interactive 3D modeling and design to meet your site's unique requirements.

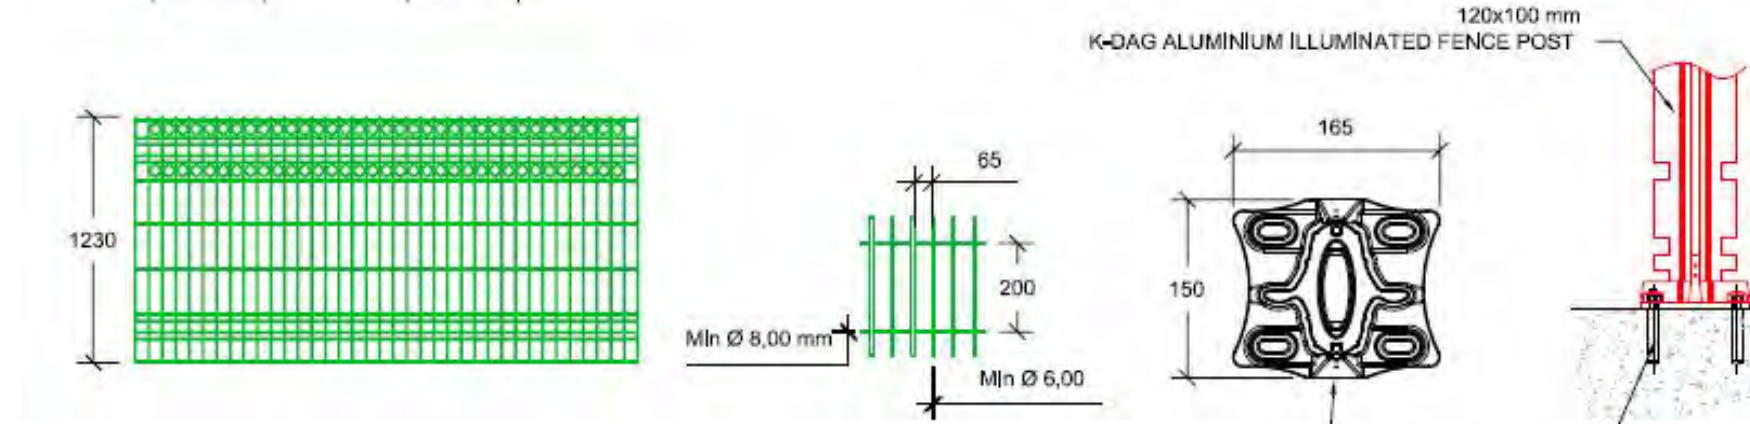

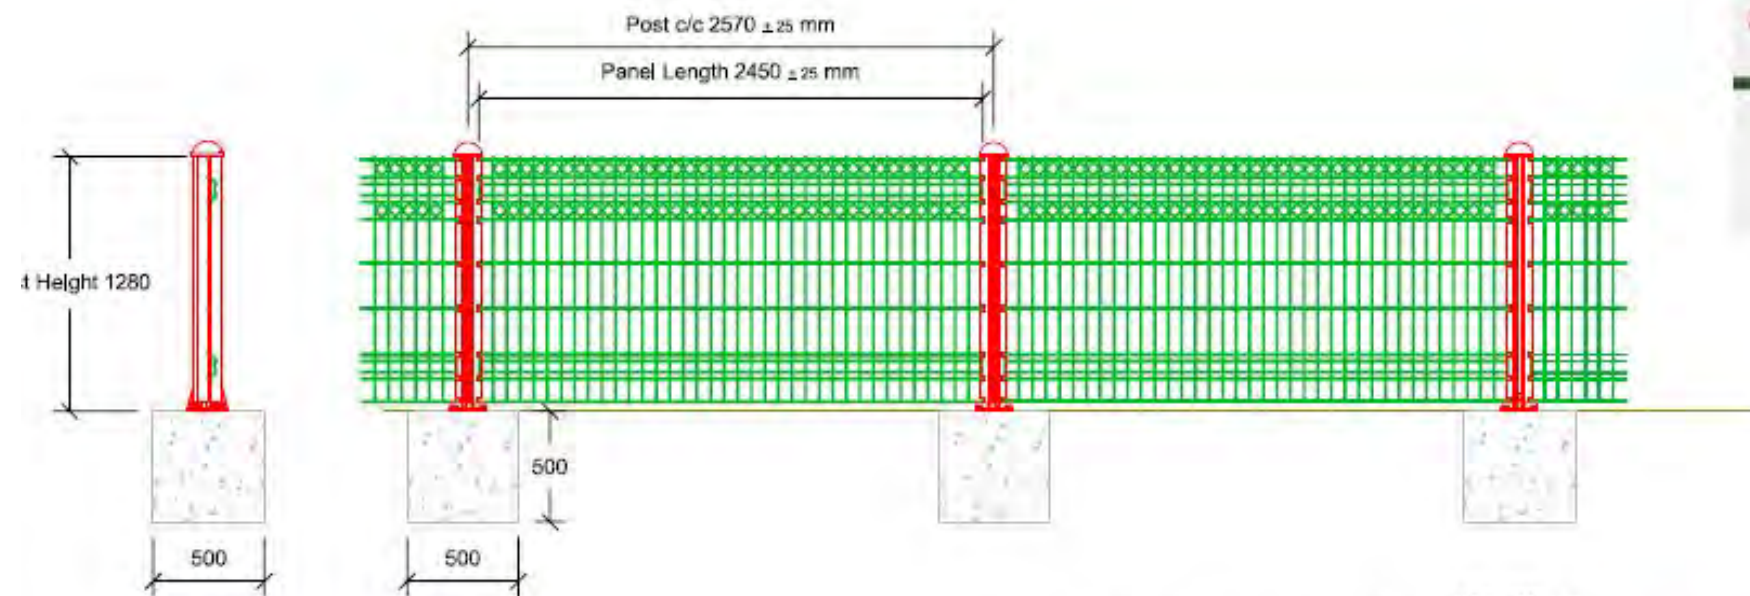

### CUSTOM SOLUTIONS

Developed, designed and engineered to meet your site specific requirements. Bear Mountain offers a multitude of mesh dimensions, wire gauges and coatings.

Bear Mountain's Bear Grip Self-Locking Posts have revolutionized the method fencing materials are installed by eliminating the need to use mechanical fasteners.

### BEAR GRIP SELF-LOCKING POST WITH SOLAR LIGHT POST CAP

Bear Mountain's Specially designed post systems provide a self-locking mechanism to connect panel to post without having to use any mechanical fasteners. Bear's Solar Light Post Cap and Posts can integrate site illumination without having to install any electrical infrastructure

BEAR GRIP SELF-LOCK POST WITH SOLAR LIGHT POST CAP

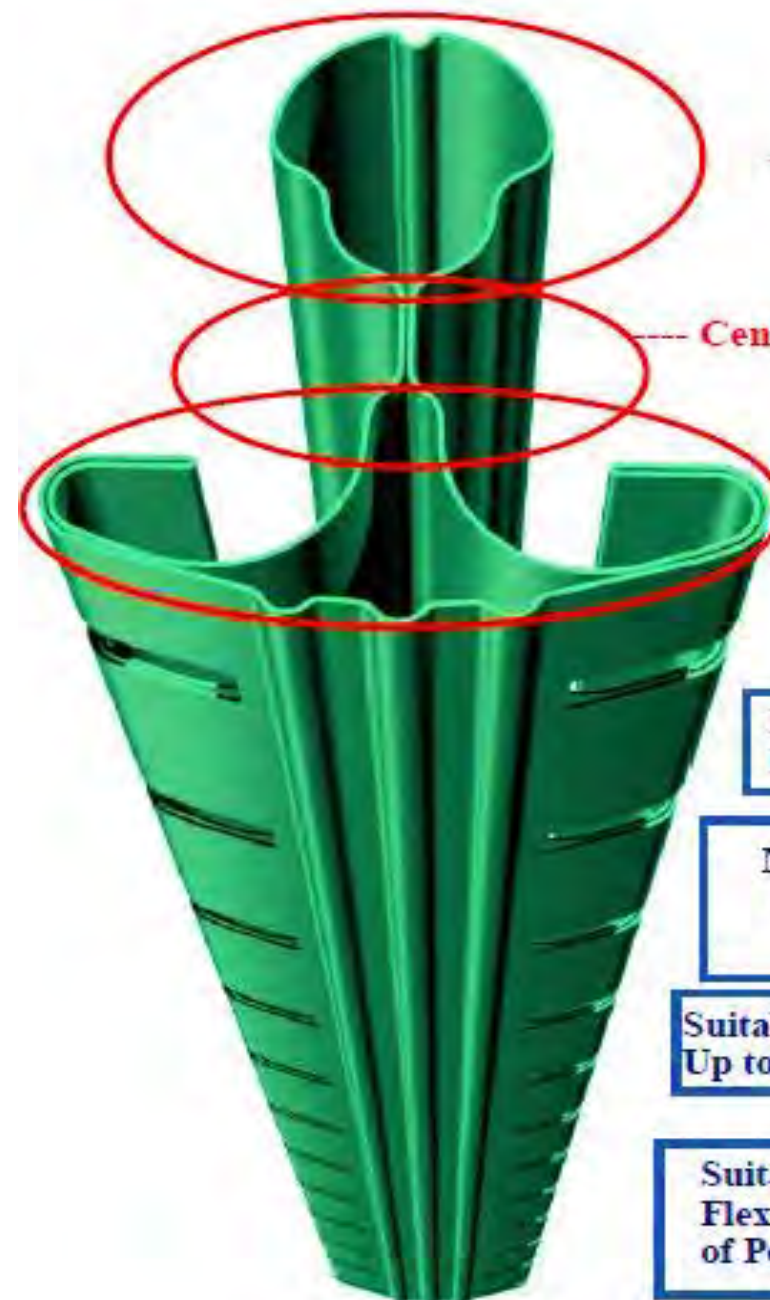

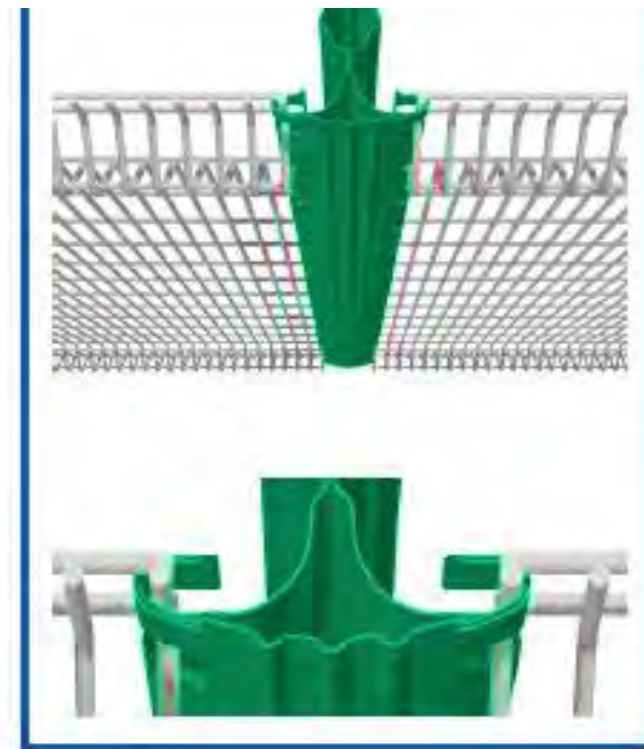

- The specially designed Steel Bear Grip Self-Locking Post features a 3 post type design which increases the rigidity and provides a pleasing finish to the fence line.

- Due to the double layer Steel Rolling process of the Bear Grip Post, the material strength properties are increased whilst maintaining an economic advantage.

- The Bear Grip Self-Locking Post has eliminated the conventional production methods of cutting, welding, clamping and the need to use mechanical fasteners.

- Preventing the risk of coating damage during installation as it is free of accessories such as screws, bolts, clips or clamps.

--- Back Section

--- Central Section

--- Front Section

High rigidity due to unique Design. (Tripple section)

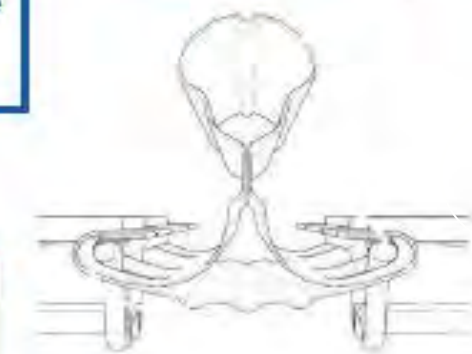

No drilling or welding is Required.

No fitting required due to side fixation (self-locking)

Suitable for corner applications Up to 135°

Suitable for sloppy terrain due to Flexibility attributed to side notches of Post
