Building Information for Roosevelt Senior High School

Government of the District of Columbia DEPARTMENT OF GENERAL SERVICES

ROOSEVELT SENIOR HIGH SCHOOL

Create a "heart" of the school

The existing courtyard will be transformed into an enclosed atrium, creating a year-round active space at the very heart of the school.

Public program elements located around the atrium, such as the media center, dining, college and career counseling will activate the space all day, every day.

Create a distinct entrance for Roosevelt STAY

A separate and distinct entrance for S.T.A.Y. will also serve as a secure entry point for the community when accessing the gym, pool and health clinics.

Turnover

The project has experienced delays due to environmental matters specific to soil contaminants and additional archaeological testing related to the geothermal fields which is a sustainable / renewable source to heat and cool the building. Due to unforeseen and unavoidable delays in the construction timeline, DCPS in collaboration with DGS has decided to delay the facility opening to August, 2016.

Description

Theodore Roosevelt High School is located at 4301 13th Street, NW, Washington, DC, which is located in the Petsworth neighborhood in Ward 4. Roosevelt High School, home of the Rough Riders, was first constructed from 1930 to 1932 for a student population of approximately 1200 students. The Roosevelt S.T.A.Y. program shares space at Roosevelt High school. S.T.A.Y. is an alternative education program for the District of Columbia residents who wish to continue their education or participate in specialized job training programs. The school features a

rigorous academic program and many strong college and career-related programs, including media and mass communications, business and entrepreneurship, culinary arts, barbering, and cosmetology. They offer a variety of competitive sports programs, and experienced guidance and wellness counselors to help students adjust to high school and prepare for college and career studies.

The renewed Roosevelt campus is centered around a new enclosed, central atrium that will serve as the "heart" of the modernized school. In endeavoring to create a great 21st-century school for Roosevelt's students, staff and community, this design will:

- Provide technology-enhanced classrooms and laboratories that stimulate disciplinary exploration.
- Foster the intellectual, social and emotional development critical to Roosevelt education by providing not only the best individual instructional spaces but also complementary places for positive school community interaction outside of class.
- Nurture a sense of civic pride in the students by renovating and re-opening the historic, prominent 13th Street main entrance.
- Promote proactive and subtle security by providing dedicated zones for the school and the
 public, and by distributing spaces for faculty and staff throughout the campus.
- Reduce the perceived scale of the school for the users by streamlining the circulation through the building, and by creating identifiable "neighborhoods" of classrooms and support spaces based around the school's academy structure.
- Enable active community use of the gym, pool natatorium, and health clinic, without disruption of the academic program by zoning the facility for after school use.
- Promote safe and accessible pedestrian patterns around the site.
- Create a "high performance" school that both conserves resources and creates an
 environment conducive to learning.

This design was developed through a collaborative process engaging the faculty and staff of Roosevelt Senior High School, Roosevelt STAY, the School Improvement Team (SIT), the students, and community. By carefully analyzing the surrounding context, the existing school buildings, the sloping site topography, the traffic on and around the site, and the educational specifications, the team developed 10 design principles to help shape the intervention in and around the building.

Re-establish the historic main entrance

When the additions were added to the school in the late 1970s, the main entrance was relocated to a service door at the back of the building. The renovation will restore the 13th Street historic main entrance and lobby, whose civic presence will instill a sense of pride in the students every time they enter the building.

Create a distinct entrance for Roosevelt STAY

A separate and distinct entrance for S.T.A.Y. will also serve as a secure entry point for the community when accessing the gym, pool and health clinics.

Create a "heart" of the school

The existing courtyard will be transformed into an enclosed atrium, creating a year-round active space at the very heart of the school.

Public program elements located around the atrium, such as the media center, dining, college and career counseling will activate the space all day, every day.

Clearly organize the building into Academic, Arts, and Physical Education zones.

By arranging the Arts, Academic and Physical Education program into clear zones corresponding to the individual buildings comprising the campus, circulation and way finding in the building will be greatly improved.

Celebrate sustainable design strategies in the building.

Celebrating the sustainable design strategies in the architecture, such as storm water management and on-site power generation, creates educational opportunities for the students and teachers.

Restore the integrity of the 1930's buildings

Removing inappropriate additions and introducing natural light and scale to the retained portion of the 1970's buildings will create new, high performance learning environments where they previously did not exist.

Celebrate the existing historic architecture

Bring back the historic elements of the entry lobby and cupola and distinguish new additions through modern and light-filled design.

Support the school's academy structure. Create distinct places and identities for each academy.

Foster subtle security

Clear circulation paths and distributing administrators throughout the campus to foster subtle security and a safe learning environment.

SBE SUBCONTRACTING PLAN

INSTRUCTIONS: All construction & non-construction contracts for government-assisted projects (agency contracts & private project with District subsidy) over \$250,000, shall require at least 35% of the amount of the contract (total amount of agency contract or total private project development costs) be subcontracted to Small Business Enterprises (SBE), if insufficient qualified SBEs to Certified Business Enterprises (CBE). The SBE Subcontracting Plan must list all SBE and CBE subcontracts at every tier. Once the SBE Subcontracting Plan is submitted for agency contracts, options & extensions, it can only be amended with DSLBD's consent.

SUBMISSION OF SBE SUBCONTRACTING PLAN:

*For agency solicitations - submit to agency with bid/proposal.

*For agency options & extensions - submit to agency before option or extension exercised.

For private projects - submit to DSLBD, agency project manager and District of Columbia Auditor, with each quarterly report. As private projects may not have awarded all contracts at the time the District subsidy is granted, the SBE Subcontracting Plan may be submitted simultaneously with each quarterly report and list all SBE/CBE subcontracts executed by the time of submission.

CREDIT: For each subcontract listed on the SBE Subcontracting Plan, credit will only be given for the portion of the subcontract performed, at every tier, by a SBE/CBE using its own organization and resources. COPIES OF EACH FULLY EXECUTED SUBCONTRACT WITH SBEs and CBEs (AT EVERY TIER) MUST BE PROVIDED TO RECEIVE CREDIT.

EXEMPTION: If the Beneficiary (Prime Contractor or Developer) is a CBE and will perform the ENTIRE government-assisted project with its own organization and resources and will NOT subcontract any portion of the services and goods, then the CBE is not required to subcontract 35% to SBEs.
