SECTION B CONTRACT TYPE, SUPPLIES OR SERVICES, AND PRICE/COST

B.1 INTRODUCTION

The District of Columbia (the “District”) Department of General Services (the “Department” or “DGS”), is issuing this Invitation for Bids (“IFB” or “Solicitation”) to engage a highly qualified contractor (the “Contractor”) to provide all labor, materials, and equipment to complete the upgrades and construction services for the existing shower and ventilation of the Youth Services Center (“YSC”) Shower and Ventilation Upgrades for the Department of Youth Rehabilitation Services (“DYRS”) (the “Project”) in accordance with this IFB, including, but not limited to, Section C of this IFB, the Contract Drawings and Specifications (**Attachments J.1A and J.1B**), the DGS Standard Contract Provisions for Construction Contracts (**Attachment J.3**), and other associated attachments of this IFB. The Project is located at 1000 Mt. Olivet Road, NE Washington DC 20002.

B.2 TYPE OF CONTRACT

This will be Lump Sum Price type contract. Bidders will be required to provide a Lump Sum Price to complete the Project, including, but not limited to, profit, home and field office overhead, supervision, labor, materials, equipment, bonds, insurance and other services that may be required to obtain the necessary permits, and construct the work and complete the Project. The Lump Sum Price shall also include items that are not specifically identified on the Drawings and Specifications, but which are reasonably inferable therefrom. The Department contemplates the award of a Lump Sum Price contract to one contractor (the “Contract”); therefore, the Contract resulting from this IFB will be made to the lowest evaluated bidder who is responsive and responsible.

B.3 FORM OF OFFER LETTER AND BID FORM – Lump Sum Price

B.3.1 Lump Sum Price

The awarded Contractor shall be paid a Lump Sum Price, as detailed in **Attachment J.2**, to complete the Project.

B.3.2 Work Included in the Lump Sum Price

The Bidder acknowledges and understands that the Lump Sum Price is based on the Specifications/Scope of Work (Section C), including the **Drawings and Specifications (Attachments J.1A and J.1B)**, which are incorporated into the Contract awarded pursuant to this IFB. It is understood and agreed that the Lump Sum Price represents the Bidder’s offer to complete the Project. The Parties acknowledge and agree that the Contractor is obligated to provide all labor, materials, and equipment to complete the Project as contemplated in the Contract Documents, for the Lump Sum Price and consistent with the Project schedule. In furtherance of such agreement, the awarded Contractor assumes the risks associated with and shall be responsible for: (i) any changes in market conditions that affect the cost of labor or materials; (ii) coordination issues between the Drawings; (iii)

elements of work not shown on the Contract Documents, but which are reasonably inferable from the Contract Documents; (iv) cost associated with acceleration of the work and expediting of materials necessary to meet the Project schedule which are the result of anything other than an excusable delay; and (v) the risk of subcontractor default or non-performance. It is understood and agreed by the Parties that items (i) through (v) listed in the preceding sentence are not intended to be an exclusive list of the risks assumed by the awarded Contractor and that such items represent a partial list of the risks assumed by the awarded Contractor.

B.3.3 Basis of Lump Sum Price

The Lump Sum Price is based on the following documents that are incorporated into the IFB and resulting Contract:

B.3.3.1 Attachment J.1A and J.1B

Drawings and Specifications

B.3.3.2 Attachment J.2

Form of Offer Letter and Bid Form

B.4 ACKNOWLEDGEMENT OF REVIEW OF CONTRACT DOCUMENTS

Before submitting its bid in response to this IFB, the Bidder acknowledges that it reviewed the Drawings and Specifications for accuracy, constructability, and completeness and was required to bring such deficiencies to the attention of the Department so that the Department's Architect/Engineer can address any such deficiencies. The Contractor acknowledges that any deficiencies it identifies after submitting its bid shall not be the basis for a change in the Lump Sum Price or delaying the Project Schedule to the extent that any such deficiencies in the Drawings and Specifications could have been identified by prior review of a competent prospective Contractor or are considered to be reasonably inferred to be required to complete the work.

- B.4.1** During the term of the Contract, should any errors, omissions, ambiguities or discrepancies be found in the Contract Documents, or should there be found any discrepancies between the Contract Documents to which the Contractor has failed to call attention before submitting its bid, the Contractor shall bring any such errors, omissions, ambiguities or discrepancies to the attention of the Department, and the Department will interpret the intent of the Contract Documents. The Contractor agrees to abide by and to carry out the work in accordance with the decision of the Department with no delay. Wherever the intent of the Contract Documents is not indicated clearly or there is a conflict between the Contract Documents, the awarded Contractor will be held to have included in the Lump Sum Price the more expensive material or method of construction and the quantity of material.
- B.4.2** If any item or material shown on the Drawings is omitted from the Specifications, or vice versa (except when the Drawings and Specifications clearly exclude such omitted item), and such item or material is required to complete the detail shown or specified, and if additional details or instructions are required to complete the work, then the Contractor is deemed to have made an allowance in the Lump Sum Price for the completion of the work, consistent with adjoining or similar details and the best accepted practices of the trade for projects of this type and quality, whichever is more expensive unless such additional information was not reasonably inferable from the Contract Documents. Without limiting the Contractor's other duties, in the case of a difference among the Contract Documents as to the Contractor's obligations, or an inconsistency in the Contract Documents, the Department will decide which requirement governs; however, the Contractor shall assume that the more expensive material or method of construction and the quantity of material shall be required without a change to the Lump Sum Price.
- B.4.3** Execution of the Contract by the Contractor is a representation that the Contractor has thoroughly examined all Contract Documents, including all details, plans, elevations, sections, schedules and diagrams, has visited the site, has become familiar with local conditions under which the Work is to be performed, has correlated personal observations with the requirements of the Contract Documents, and has satisfied itself before executing the Contract as to all matters that can affect the Work and its cost, including: (1) the nature of the land and subsoil; (2) the form and nature of the site and surrounding areas; (3) details and levels of existing pipe lines, conduits, sewers, drains, cables or other existing services; (4) the quantities, nature and availability of the materials, tools, equipment and labor necessary for the completion of the Work; (5) the means of access to the site and any accommodation the Contractor may require; (6) Familiarize themselves with the risks and mitigation costs associated with the hazardous materials and contaminated soils on the Project site; (7) uncertainties of weather and physical conditions at the site; and (8) in general to have the Contractor obtain all necessary information as to risk contingencies, climatic, hydrological, and natural conditions and other circumstances which

may influence or affect the Contractor's performance of the Work. The Contractor waives any and all claims against the Department arising from or relating to such contingencies and conditions that are reasonably inferable from the Contract Documents, in light of the required preconstruction review and inspection and the Contractor's expertise in the field of construction.

B.5 A Bidder responding to this IFB must submit with its bid a copy of the Certification Acknowledgment Letter, and a notarized statement detailing any subcontracting plan required by law. A Bidder responding to this IFB shall be deemed nonresponsive and shall be rejected if the Bidder fails to submit a subcontracting plan required by law. For contracts more than \$250,000.00, a Bidder shall ensure that its bid complies with the subcontracting requirement(s) in accordance with Section H.9 of this IFB.

B.6 NONPROFIT FAIR COMPENSATION ACT OF 2020, D.C. Code § 2-222.01 et seq.

B.6.1 Nonprofit organizations, as defined in the Act, shall include in their rates the indirect costs incurred in provision of goods or performance of services under this Contract pursuant to the Nonprofit Organization's unexpired Negotiated Indirect Cost Rate Agreement (NICRA). If a Nonprofit Organization does not have an unexpired NICRA, the Nonprofit Organization may elect to instead include in its rates its indirect costs:

(1) As calculated using a *de minimis* rate of 10% of all direct costs under this Contract;

(2) By negotiating a new percentage indirect cost rate with the awarding agency;

(3) As calculated with the same percentage indirect cost rate as the Nonprofit Organization negotiated with any District agency within the past 2 years; however, a Nonprofit Organization may request to renegotiate Indirect Costs Rates in accordance with B.7.2; or

(4) As calculated with a percentage rate and base amount, determined by a Certified Public Accountant, as defined in the Act, using the Nonprofit Organization's audited financial statements from the immediately preceding fiscal year, pursuant to the OMB Uniform Guidance, and certified in writing by the certified public accountant.

B.6.2 If this Contract is funded by a federal agency, indirect costs shall be consistent with the requirements for pass-through entities in 2 C.F.R. § 200.331, or any successor regulations.

B.6.3 The Contractor shall pay its subcontractors which are Nonprofit Organizations the same Indirect Costs Rates as the Nonprofit Organization subcontractors would have received as a Prime Contractor.

B.7 Campaign Finance Reform Act

B.7.1 The Contractor agrees to comply with the Campaign Finance Reform Act certification requirement pursuant to the D.C. Official Code § 1-1161.01. The Contractor shall complete the self-certification provided as **Attachment J.17**.

SECTION C SCOPE OF WORK (“SOW”)/SPECIFICATIONS

C.1 BACKGROUND

The DYRS is the District’s cabinet-level juvenile agency. It administers detention, commitment, and aftercare services for youth held under the care in its YSC facility. DYRS provides a wide range of programs emphasizing individual strengths, skill development, person accountability, family empowerment, community engagement and public safety. The services provided by YSC include diagnostic assessments and placement services, behavioral and physical health care, educational services, and security.

The YSC is an 88-bed secure residential facility for detained male and female youth awaiting adjudication and/or disposition by the courts. YSC is a 55426 square foot facility with three above ground floors and one level below ground floor with an average of 100-125 employees present on a daily basis. In addition to the employees, YSC experiences an average of 75 to 125 daily visitors and has a community center that hosts several special events throughout the year. The YSC has a 24-hour supervision and comprehensive social services, including a variety of academic and experimental programs. Youth attend school five hours a day, five days per week. The YSC has a level IV Facility Security Level (“FSL”) based on agency mission, function, and tenant population, and degree of public access. The security level needed for this facility warrants a 24/7 access control screening post and a central control that is staffed to operate the Supervisory Control and Data Acquisition system, provide continuous monitoring of the 120 live-feed camera systems, and provide 360-degree security over watch of the main lobby and secure areas.

The primary functions of the access and egress control post for YSC is the regulation of all movement (personnel and deliveries) into, out of, and within the designated building or area. Security personnel stand post at the entry/exit point(s) to verify all individual’s identification and conduct inquiries and surveillance of suspicious items, packages, and people. The purpose of this post provides protection for all personnel and property within, and the facility itself. With effective access and egress control, this is accomplished daily. The central control room is heart of security. It serves as a central space where physical and electronic security is monitored and controlled by security professionals.

Such schedule shall include a schedule for submittals that is reasonably acceptable to the Project Manager. The Project Manager shall have five (5) business days to review such submittal.

Unless a different timeframe is established in the approved baseline schedule, the Architect/Engineer and/or the Program Manager shall have twenty-one (21) business days to review such documents. In the event the Program Manager finds such documents to be

unacceptable, the Contractor shall be required to revise and resubmit such documents. Any delays that result from any construction phase submittal resubmissions shall be considered non-excusable.

carefully study and compare the Drawings and Specifications with each other and with information furnished by the Department. Before commencing activities, the Contractor shall: (1) take field measurements and verify field conditions; (2) carefully compare this and other information known to the Contractor with the Drawings and Specifications; and (3) promptly report errors, inconsistencies, or omissions discovered to the Department. Once work is started, the Contractor assumes the responsibility and costs for the work and the cost of correcting work previously installed.

C.6.4 Warranty of the Construction Work. The Contractor warrants to the Department that materials and equipment furnished under the Contract will be of good quality and new unless otherwise expressly permitted in writing, and that for the one (1) year period following the Substantial Completion Date the construction work will be free from defects not inherent in the quality required or permitted, and that the work will conform to the Construction Documents and/or any approved design documents. The Contractor shall be entitled to an equitable adjustment in accordance with the Standard Contract Provisions for differing site conditions only to the extent that: (i) such conditions could not have been discovered by a competent visual inspection of the site, are of unusual nature, and differ materially from those ordinarily encountered and generally recognized as inhering to work of the character provided for in the Contract; or (ii) with regard to subsurface conditions on or adjacent to the Project site, such subsurface conditions differ materially from those indicated in the geotechnical reports (such circumstances, "Differing Site Conditions"). Prior to commencing construction, the Contractor shall be required to conduct a thorough review of the Project site and the surrounding area and shall document its findings. In the event the Contractor fails to undertake and document such a thorough review, the Contractor shall be deemed to have known of those conditions which a thorough review would have detected. Any Change Request related to Differing Site Conditions shall be made pursuant to the Standard Contract Provisions for Construction Contracts (**Attachment J.3**).

C.6.6 Unsafe Materials and Hazardous Materials

C.6.6.1 The Contractor shall abate and legally dispose of any Hazardous Materials in the demolished facility, in accordance with Environmental Protection Agency ("EPA") and all jurisdictional agencies' rules and regulations. or any other Hazardous Material that is not customarily used in a facility of the type and similar to the Project and shall bring to the Department's attention any specification of such Hazardous Materials in the design documents. If the Contractor believes that anything in the Contract would require that it use or bring onto the site asbestos, PCBs, or any Hazardous Material that is not customarily used in a facility of the type and similar to the Project, it shall immediately inform the Department and seek direction before proceeding.

C.6.6.3 The Contractor's Scope of Work includes the abatement and removal of hazardous materials found within the existing building. In performing such work, the Contractor shall comply with all laws, including, without limitation, the requirements of the EPA and all jurisdictional agencies as well as all laws relating to safety, health welfare, and protection of the environment, in removing, treating, encapsulating, passivating, and/or disposing of hazardous materials, including, but not limited to, removal, treatment, encapsulation, passivation, and/or disposal of the hazardous materials. If any notices to governmental authorities are required, the Contractor shall also give those notices at the appropriate times. The Contractor shall ensure abatement subcontractors and disposal sites are appropriately licensed and qualified. In addition, the Contractor shall ensure that any subcontractors involved in the abatement of hazardous materials maintain a contractor's pollution legal liability insurance policy of at least Two Million Dollars (\$2,000,000) for the duration of the Project and a period of three (3) years after Substantial Completion of the Project and that any disposal site to which hazardous materials are taken carries environmental impairment liability insurance for the duration of the Project and a period of three (3) years after Substantial Completion of the Project. The Contractor's obligations under this paragraph shall include signing (as the agent for the Department) any manifests required for the disposal of hazardous materials.

C.6.7 Progress Meetings. The Contractor shall schedule and conduct at a minimum bi-weekly progress meetings at which the Department, the Program Manager, the Contractor and appropriate Subcontractors can discuss the status of the work. The Contractor shall prepare and promptly distribute meeting minutes.

The Contractor shall provide written reports to the Program Manager on the progress of the entire work in accordance at least every other week, including, but not limited to, a baseline schedule and schedule updates with narrative demonstrating the critical path of the Project in Primavera format. The Contractor shall also maintain a daily log containing a record of weather, Subcontractors working on the site, number of workers, major equipment on the site, work accomplished, problems encountered, and other similar relevant data as the Department may reasonably require. The log shall be available to the Department, the Architect/Engineer, and the Program Manager and a copy of the log shall be submitted to the Department on a monthly basis.

C.6.9 Work by Separate Contractors. The Department reserves the right to perform construction or operations related to the Project with the Department's own forces, and to award separate contracts in connection with other portions of the Project or other construction or operations on the site.

C.6.10 Site Safety, Clean-Up & Protection of Existing Elements. The Contractor will be required to: (i) provide a safe and efficient site, with controlled access, including the installation and provision of such safety barricades, enclosures and overhead protection as may reasonably be required by the Department and as may be necessary to ensure a safe workplace or as may be required by OSHA or other applicable law including but not limited to any COVID-19-related laws, orders, or regulations, and to remove such at the end of the work and leave the site in broom clean condition; and (ii) be responsible for the security of its tools, equipment and materials that are stored at the site. The Contractor shall be responsible for the removal and legal disposal of all construction debris. The Contractor shall protect all existing features, public utilities, and other existing structures during construction.

C.6.11 Close-out. C.6.12 Cutting and Patching. The Contractor shall be responsible for cutting, fitting or patching required to complete the work or to make its parts fit together properly. All areas requiring cutting, fitting and patching shall be restored to the condition existing prior to the cutting, fitting and patching. The Contractor shall not damage or endanger a portion of the work or fully or partially completed construction of the Department or separate Contractors by cutting, patching or otherwise altering such construction, or by excavation. The Contractor is responsible for the replacement, repair or patch of any existing surfaces or materials damaged during construction by own or subcontractor crews.

C.6.13 Salvaging and Storing. The Contractor shall be responsible for salvaging and storing all items identified by the Department in accordance with all applicable District laws and regulations. After the items have been secured, the Contractor shall notify the Department and request permission to proceed with the Project.

C.6.14 Manufacturers' Warranties C.6.14.1 The Contractor warrants that all manufacturers or other warranties on all labor, materials and equipment furnished by the Contractor or a Subcontractor or supplier shall run directly to or will be specifically assigned to Department on demand or upon Project completion without demand. In the event any issue or defect which would be covered by any warranty arises but is not addressed by the grantor of the warranty, the Contractor shall be required to act as the guarantor of the obligations under the warranty and to perform under the terms of the warranty.

C.6.14.2 The Contractor warrants that the installation of all materials and equipment shall be in strict accordance with the manufacturers' requirements or specifications.

C.6.15 Schedule Updates. The Contractor shall submit bi-weekly schedule updates which shall reflect actual conditions of Project progress as of the date of the update. The update shall reflect the actual progress of construction, identify developing delays, regardless of their cause, and reflect the Contractor's best projection of the actual date by which Substantial Completion and Final Completion of the Project will be achieved. Via a narrative statement (not merely a critical path method schedule), the Contractor shall identify the causes of any potential delay and state what, in the Contractor's judgment, must be done to avoid or reduce that delay. The Contractor shall point out, in its narrative, changes that have occurred since the last update, including those related to major changes in the scope of work, activities modified since the last update, revised projections of durations, progress and completion, revisions to the schedule logic or assumptions, and other relevant changes. Any significant variance from the previous schedule or update shall also be identified in a narrative, together with the reasons for the variance and its impact on Project completion. All schedule updates shall be in Primavera 6 format. The Department may make reasonable requests during the Project for changes to the format or for further explanation of information provided. Submission of updates showing that Substantial Completion or Final Completion of the Project will be achieved later than the applicable scheduled completion date shall not constitute requests for extension of time and shall not operate to change the scheduled completion date. The Department's receipt of, and lack of objection to, any schedule update showing Substantial Completion or Final Completion later than the dates agreed upon in the project schedule shall not be regarded as the Department's agreement that the Contractor may have an extension of time, or as a waiver of any of the Department's rights, but merely as the Contractor's representation that, as a matter of fact, Substantial Completion or Final Completion of the Project may not be completed by the agreed upon date in the Project Schedule. Changes to the scheduled completion dates may be made only in the circumstances and only by the methods set forth in the Contract.

C.7 ACCELERATION

Subject to the terms of this Section, the Department shall have the right to direct the Contractor to accelerate the work if, in the reasonable judgment of the Contracting Officer, the Contractor fails to: (i) supply a sufficiency of workers or to deliver the materials or equipment with such promptness as to prevent the delay in the progress of the work; or (ii) the progress of the work materially falls behind the projections contained in the then currently approved project schedule. In the event that the Department or its Contracting Officer's Technical Representative ("COTR") determine that either of the events specified in the preceding sentence have occurred, the Department shall provide the Contractor with written notice of such event and the Contractor shall be required to provide the Department with a corrective action plan that is reasonably designed to address the concerns raised in such notice within three (3) days after receipt of such notice. If the Department and the

Contractor are unable to agree on the terms of such corrective action plan within five (5) days after the issuance of the notice (i.e. with forty eight (48) hours after the receipt of the proposed corrective action plan), the Department shall have the right to direct such acceleration as the Department, in its reasonable judgment, deems necessary. Provided the notice provisions of this Section are complied with, the cost of any acceleration directed under this Section shall not justify an adjustment to the Lump Sum Price or the Substantial Completion Date. The Contractor hereby acknowledges that this provision is a material inducement upon which the Department has relied in entering the Contract; and represents and warrants that it has included sufficient funding in its Lump Sum Price in order to comply with the requirements of this Section.

C.8 WALK-THROUGH INSPECTION

At the achievement of Substantial Completion, the DGS COTR and a representative from DPR shall perform a walk-through inspection in the presence of the Contractor. The Contractor shall prepare a written report stating any deficiencies found during the walk-through, identify the responsible parties, and ensure that all the deficiencies are corrected by the Contractor prior to demobilization. The Contractor shall not demobilize from the site until receiving written notice, in writing, from the DGS COTR, to confirm that the deficiencies have been corrected to the DGS COTR satisfaction.

The Contractor shall utilize the Department's Project Team system to submit any and all documentation required to be provided by the Contractor, including, but not limited to: (i) requests for information; (ii) submittals; (iii) meeting minutes; (iv) invoices/applications for payment (full package including all forms required by the Department); (v) certified payrolls (in addition to upload via LCP Tracker); (vi) drawings and specifications; (vii) punchlist; and (viii) other documents as may be designated by the Department.

C.9.2 Liquidated Damages. If the Contractor fails to achieve Substantial Completion by the Substantial Completion Date, the Parties acknowledge and agree that the actual damage to the Department for the delay will be impossible to determine, and in lieu thereof, the Contractor shall pay to the Department, as fixed, agreed and liquidated delay damages in the amount of One Thousand Dollars (\$1,000.00) per day for each calendar day of delay for failure to meet the Substantial Completion Date. The Contractor and the Department agree that the Liquidated Damages do not constitute, and shall not be deemed, a penalty but represent a reasonable approximation of the damages to the Department associated with a delay in the Project.

C.9.3 Compensation. The Contractor shall be paid its compensation in a series of progress payments and a final payment. Progress payments shall be based on a Schedule of Values that is agreed upon by the Parties, as well as the Program Manager's good faith estimate of the level of completion for each component of the Schedule of Values. The Contractor shall prepare the Schedule of Values, which breaks down the Lump Sum Price for the various parts of the work. The Schedule of Values shall be maintained in such

a manner to provide a breakdown of the Lump Sum Price in enough detail to facilitate the continued evaluation of applications for payment and progress reports. Large Subcontracts shall be broken into several line items where, in the reasonable opinion of the Program Manager, such detail is necessary to properly track the progress of the work. The proposed schedule of values shall also include separate line items for each part of the work if so required by the Program Manager. The Contractor and the Program Manager shall meet as necessary to maintain the schedule of values for the Project in a manner acceptable to the Program Manager. No progress payments shall be made unless the then-current Schedule of Values is acceptable to the Program Manager. The Contractor shall provide an updated and cost-loaded schedule with each pay application submission.

Further, in submitting any such bid, the Bidder shall be deemed to represent that it has satisfied itself that it can undertake the work for the proposed cost. Among other things, by submitting a bid, the Bidder assumes the following risks: (1) the nature of the land and subsoil unless such conditions constitute a Differing Site Condition; (2) the form and nature of the site and surrounding areas; (3) details and levels of existing pipelines, conduits, sewers, drains, cables or other existing services; (4) the quantities, nature, and availability of the materials, tools, equipment, and labor necessary for the completion of the work; (5) the means of access to the site and any accommodation that may be required; (6) uncertainties of weather and physical conditions at the site; and (7) in general, to have itself obtained all necessary information as to risk contingencies, climatic, hydrological and natural conditions and other circumstances which may influence or affect the Contractor's performance of the work.

C.14 TIME IS OF THE ESSENCE.

Time is of the essence with respect to this Project. The Project must be Substantially Complete by the Substantial Completion Date. As such, by submitting a bid, the Contractor agrees to dedicate such personnel and other resources as are necessary to ensure that the Project is completed on-time and in a diligent, skilled, and professional manner.
