21	Children play area needs to be visible from the street. Not enough eyes on the park. Street area playground space should be priority. Elevation issues in Fort Lincoln are not ideal but we must solve the problem. People do not walk up the hill to play. Children play areas should be designed with attention to the access point from walking.	6/25/2020 5:47 AM

The stage area should be improved for performances or movie nights. It needs an outlet and a safer way to get up and down on the "turf stage area". It also needs some shade to be used.	6/16/2020 8:32 PM

36	Sadly, the property management companies like EJP that run the townhouse communities around Ft. Lincoln Park are very strict about not allowing children to play in limited-common or common areas. I think this is unfortunate. So I believe it's very important to have an excellent children's play area in the community.	6/13/2020 8:45 PM

13	- Better use of the open green space (so much of the area behind the community garden / baseball fields is ignored); - Better placement of the community garden so that it is seen and engaged with more frequently (and safer); - Better parking (e.g. more and positioned for safer entry/exit) - Again, a dog park. Currently - especially during COVID - people have all been using the baseball fields for their pets. AND since we have so few trash cans, older residents with larger dogs don't regularly pick up after their waste so we have a huge dog poop problem all over the park. A designated space (and walking path) would help connect the dog community and provide cleaner spaces for everyone). Also, people bring their pets here who don't live in the area so we really need consideration for this growing animal presence. - The park receives so much natural sunlight atop the hill that it would be forward-thinking to offset the need for late night lighting with solar-powered options for energy. This would also help with USB needs for long hours on the tennis court or attending games.	7/8/2020 11:02 PM

71	Fort Lincoln public space is dated. Needs a face lift. But it also needs newer thinking. Several problems need to be resolved. Don't rearrange everything, but finessing certain areas is critical. Design with access points from certain parts of the community. Leverage street parking over paved parking, where possible. Eyes from the road for children uses. Focus on 12 month uses.
