

Notes/Comments

- Flat surfaces in the area tend to be graffiti magnets
- Playground equipment needs to be “open” for sight lines and visual access.
- We need to keep the benches uniform with the benches in the rest of the park. Kathryn will send us the specifications.
- Provide 3 concepts showing different sandbox locations and configurations. The sandbox tends to be used more in the 5-12 play space.
- Natural colors are preferred. Climber at Takoma mentioned (below):
- Can we re-use any of the EWF surfacing to save money?
- Keep sandboxes the same size if not bigger.
- Will a circular tree bench work in the playground?
- Add more benches where they will fit.
- Think about the transition between the tot lot and the older kids playspace.
- Next meeting – potentially Jan 26th or 27th, to be confirmed.
