Lansburgh Park

Community Meeting

August 10, 2020

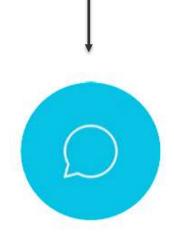

Welcome! Thank you for your participation.

- Please keep your microphone on mute.
- Please use the chat feature to ask questions or provide comments which will be read during the "Ouestion Breaks".
- The chat function is located beside your name in the Participant Panel looks like a cloud symbol. Be sure to submit your question / comment to "Everyone" so the design team can see them.
- We'll do the best we can to answer all questions, but if your question is not answered, DPR
 is tracking all questions and will create a Q/A document that will be shared after the
 meeting.

ACTIVITIES FOR KIDS!

AGENDA

- 1. Introductions
- 2. Project Overview
- 3. Project Site and Site Analysis
- 4. Project Stabilization and Design
- 5. Next Steps
- 6. Contact Information
- 7. Questions:

SCOPE OF WORK

- Budget: \$900,000
- Revitalize the historic stage, pavilions and seating plaza
- Install new lighting
- Add an ADA ramp to the stage
- Repair concrete, cobblestone and other ADA trip hazards
- Add a bottle filler and drinking fountain
- Site furnishings (benches, etc.)
- Add a play area
- New site signage and murals

Existing Conditions

VAULTED METAL-CLAD ARBORS Existing Conditions

Existing Conditions

- Metal structures have deteriorated over the years with corrosion from rain and debris collection
- Metal posts have been cut and not properly sealed
- Vaulted canopies are worn, rusted and broken
- Footings are corroded
- Existing lighting added over time is not in working condition

VAULTED METAL-CLAD ARBORS Proposed Repairs & Improvements

Proposed Repairs & Improvements

- Repair and refinish corroded metal structures
- Improve water drainage, debris collection and lower maintenance over time with minor alterations to the metal post tops
- Restore corroded posts and replace damaged roof surfaces. Improvements to retain the character of the original design
- New lighting is added to the underside of the vaulted structures to welcome arbor use, provide park lighting and to highlight the beautiful historic vault architecture

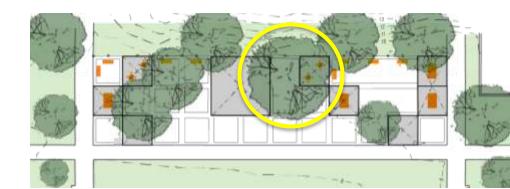

GRANITE IMBEDDED BLOCKS Existing Site Plan

Existing Conditions

- Granite blocks in grid pattern are generally in good condition but not ADA accessible.
 Some are raised by tree roots and broken.
- Protect all heritage trees. One heritage tree
 has been identified by the city arborist to
 be in poor condition and will be removed.

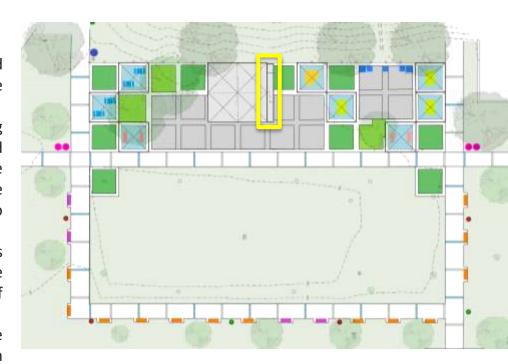

GRANITE IMBEDDED BLOCKS Proposed Site Plan

Proposed Repairs & Improvements

- Granite blocks will remain in their general grid pattern. Broken and raised paving will be replaced and leveled.
- To achieve ADA accessibility some granite paving will be removed to create larger leveled gathering areas. The original grid pattern will be represented through the control joints in the concrete. The removed paving will be reused to widen the walkway on opposite side of the path.
- To improve stormwater management pervious planted areas will be integrated, within the original grid pattern, to reduce rainwater runoff over the impervious area.
- Heritage trees will be protected. An accessible ramp will be added to access the bandstand in the location of the one removed tree.
