DRAINAGE, EROSION & LANDSCAPING IMPROVEMENTS PROJECT

Kalorama Park Community Meeting

July 17, 2014

Agenda

- ☐ Introductions
- ☐ Rules of the Road
- ☐ Completed Tasks
- ☐ Design Concepts
- ☐ Project Timeline
- ☐ Next Steps
- ☐ Contact Information
- ☐ Questions and Answers

Completed Tasks

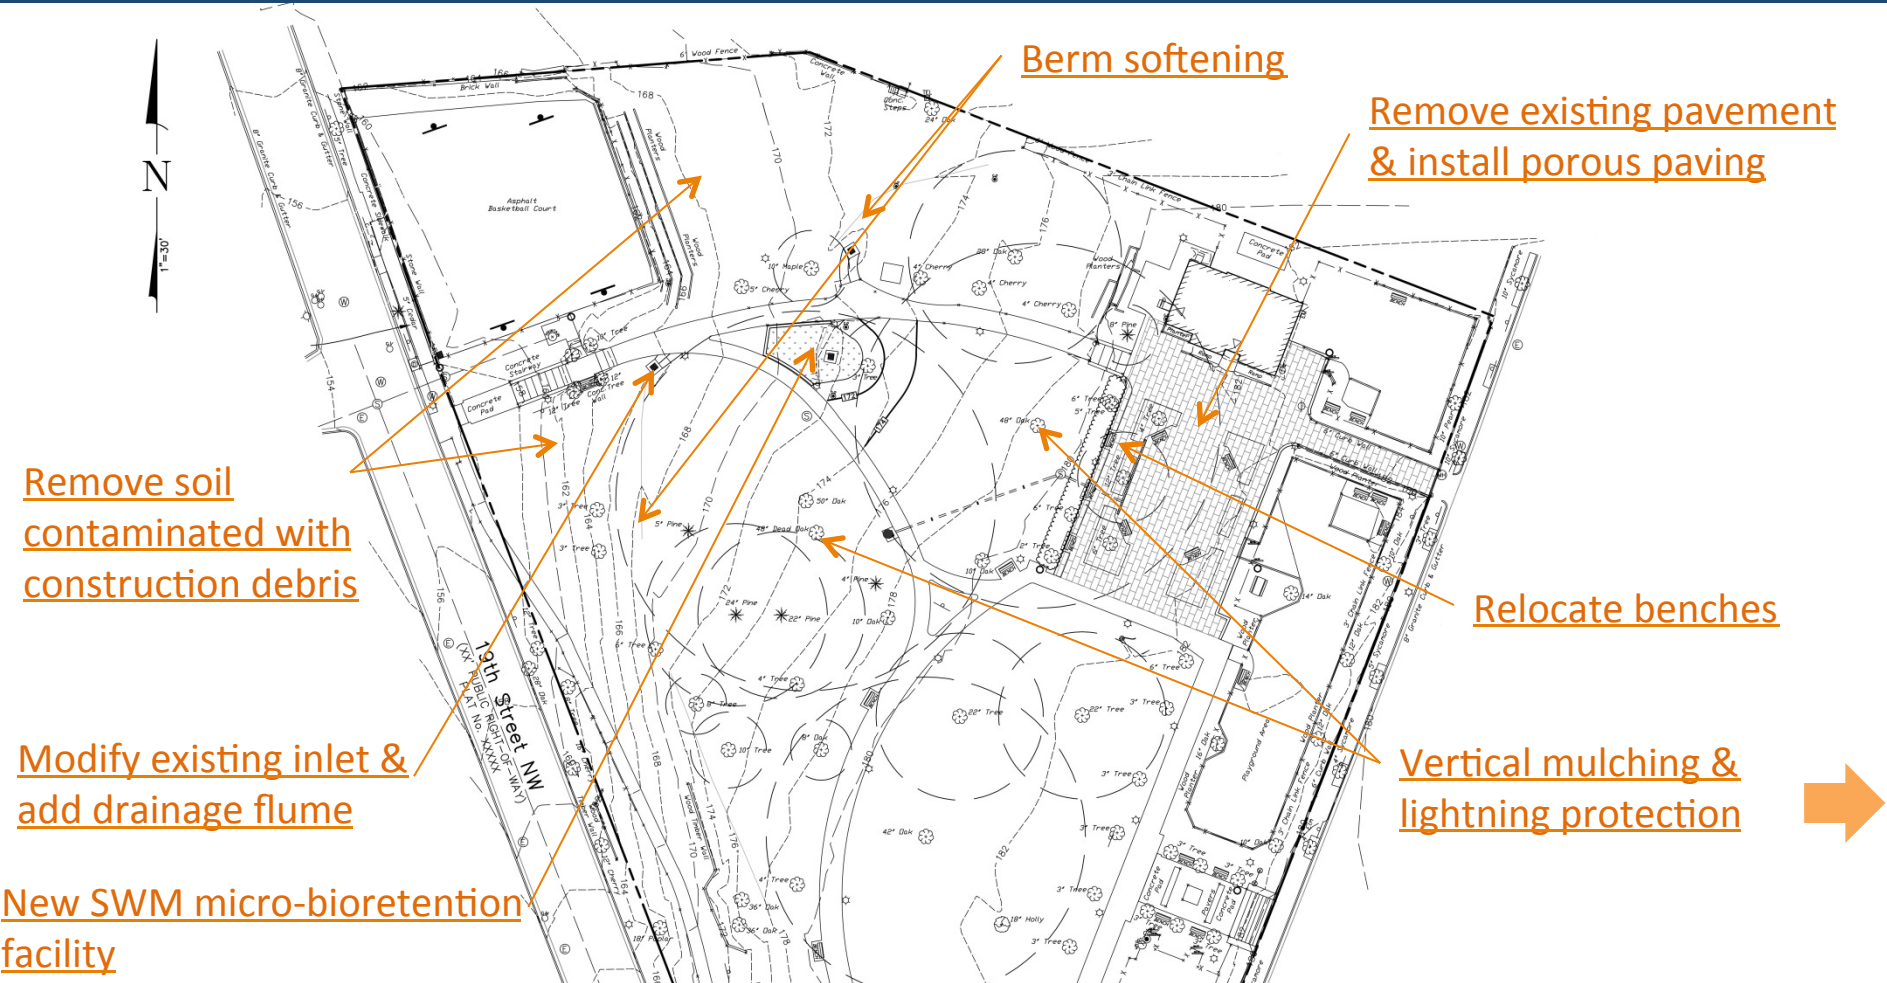

Site Surveys:

- Topographic survey completed in late June of 2014
- Lightning protection (in progress)
- Vertical mulching (in progress)

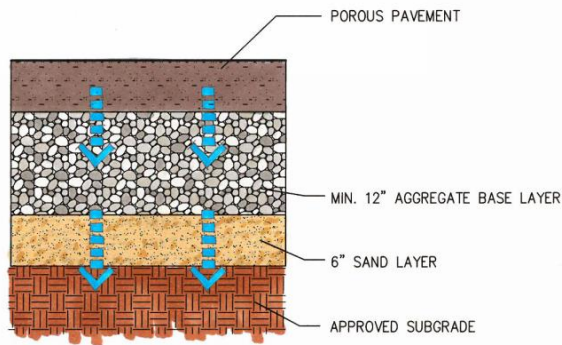

Preliminary Design:

- Drainage Improvements
- Stormwater Management
- Landscaping Improvements

Site Plan

Porous Paving

Modify Inlet & Add Drainage Flume

Before

After

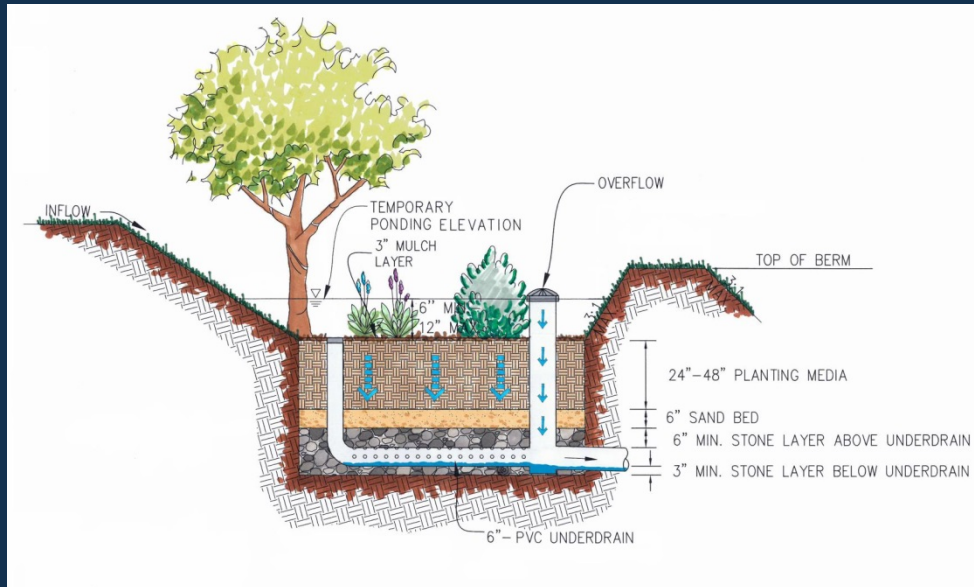

Removal of Contaminated Soils

Removal of contaminated soil and replacement with new soil based upon the June 6, 2012 Volkert report and geotechnical findings

Micro-Bioretenention Facility

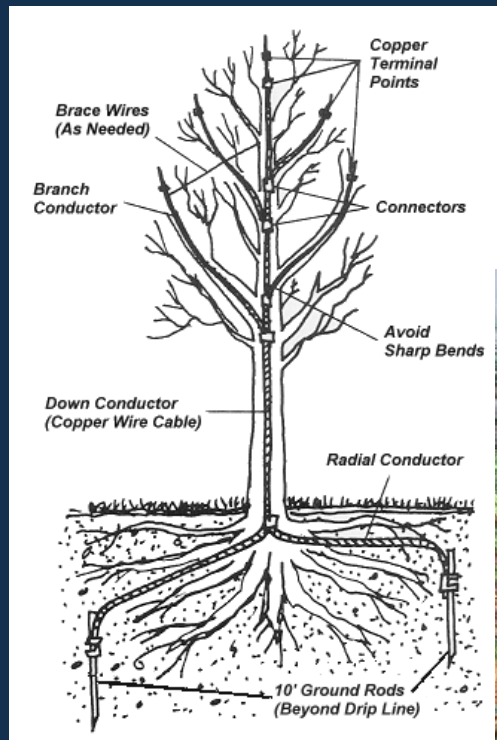

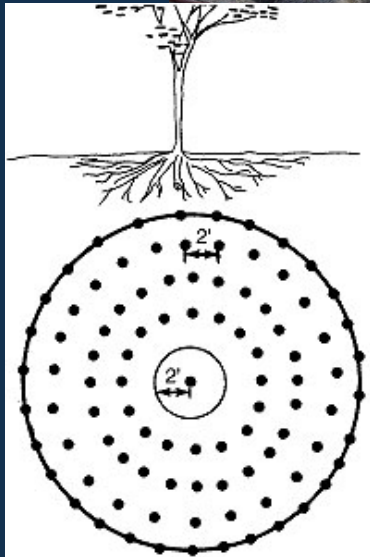

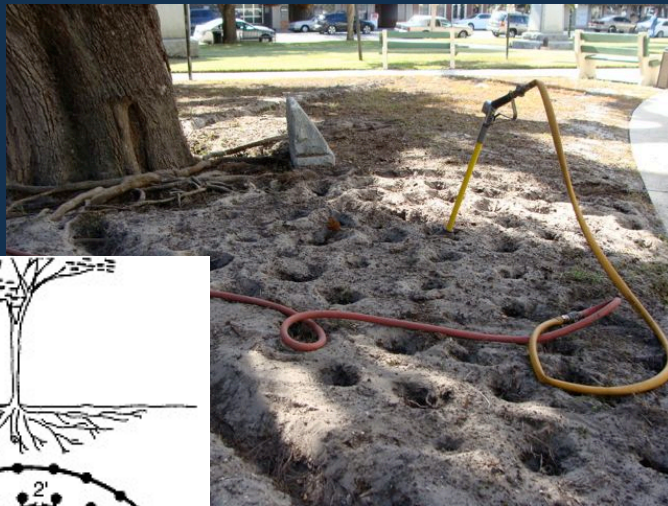

Bench Relocation & Landscape Addition

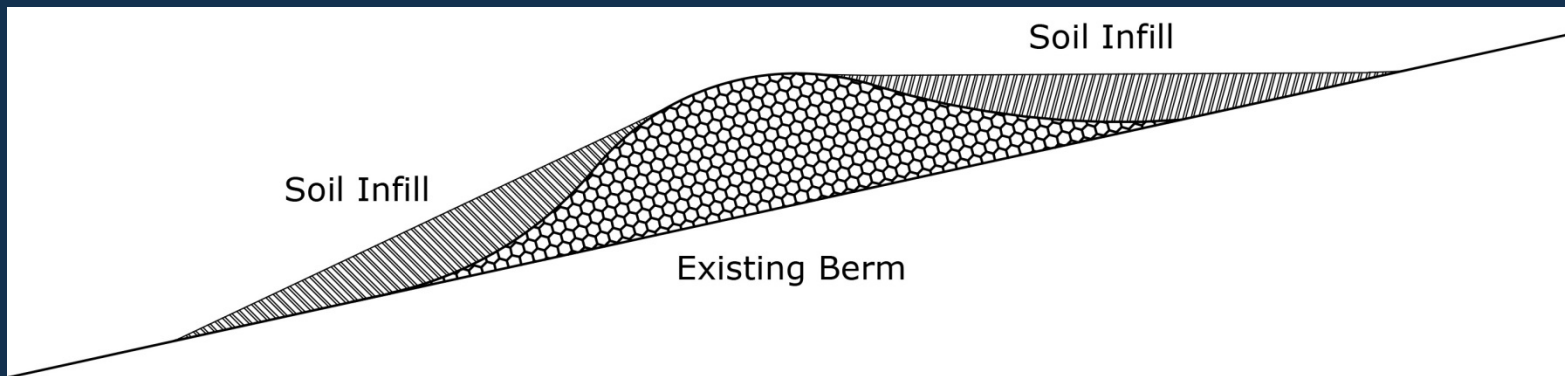

Relocation of benches and addition of low maintenance plantings to discourage heavy foot traffic through non-hardscaped areas

Vertical Mulching & Lightning Protection

Berm Softening

Before

After

Project Timeline

Site Surveys
May - June 2014

Final Design
July - August 2014

Construction
October 2014 - March 2015

Preliminary Design June -
July 2014

Permitting
September 2014

Next Steps

- DGS/DPR and Engineer will come back at 100% and summarize design with community.
- DGS/DPR to procure a General Contractor to construction and address the design/construction documents.
- DGS/DPR will provide periodic updates to the community during the construction phase of the process.
